EDUCATION

Zhejiang University, ZJU-UIUC Institute (ZJUI) Sep. 2025 – Jul. 2029 (Expected)
B.Eng. in Mechanical Engineering **GPA: 4.2/4.3**

RESEARCH EXPERIENCE

Whole-Body Control and Robot Learning Jun. 2026 – Oct. 2026
Physical Intelligence Lab, Zhejiang University — Undergraduate Research Assistant
Advisor: Prof. Liangjing Yang; previously advised by Prof. Hua Chen.

- Contributed to an RL-based whole-body controller for a bipedal mobile manipulator. The controller tracks a single 6-DoF end-effector target while coordinating arm motion, posture adaptation, and stepping without explicit locomotion commands.
- Tuned reward functions in NVIDIA Isaac Lab and performed Sim2Sim policy validation.
- Contributed to real-robot deployment on a LimX TRON 1 biped with an ARX L5 arm.
- Additional experience with UMI-based diffusion policy pipelines.

PUBLICATIONS

Learning Holistic Whole-Body Loco-Manipulation with a Bipedal Mobile Manipulator

Under Review, 2026. [Paper] [Project Page]
[*]Equal contribution. [†]Corresponding author.

WORKSHOP CONTRIBUTION

MoMA.v5 Workshop, IEEE/RSJ IROS 2026 Sep. 2026
Pittsburgh, USA
Short paper accepted for a poster session and a 2-minute spotlight presentation. [Poster]

GOALS & PLANS

My experience competing in the WBC during high school and my work on full-body control of bipedal robots have allowed me to gain expertise in deep reinforcement learning, simulation, and hardware deployment. I hope to contribute to the field of full-body robot control while also gaining hands-on experience with vision-language-action (VLA) models—an area I have had limited opportunities to explore thus far. One question I hope to explore is how to translate the output of VLA models into end-effector targets that a bipedal robot can track while maintaining balance. As a sophomore, I welcome research projects in both of these fields and hope to refine my long-term research direction through experimentation, mentorship, and continuous self-directed learning.

HONORS & AWARDS

Zhejiang Provincial Government Scholarship (CNY 6,000) Nov. 2026
Outstanding Student, Zhejiang University Oct. 2026
Pacesetter in Academic Excellence, Zhejiang University (CNY 10,000) Oct. 2026
Pacesetter in International Exchange, Zhejiang University Oct. 2026
Third Prize, 31st Zhejiang University Mechanical Design Competition Apr. 2026
Gold Medal & First Prize, World Robot Contest Finals Jan. 2024
Second Prize, National VEX Robotics Elite Competition (hosted by SJTU) Aug. 2023

SKILLS

- **Programming:** Python(Intermediate), MATLAB(Intermediate)
- **Softwares:** Linux, Git, Visual Studio, Microsoft Office, Isaac Sim
- **Languages:** TOEFL iBT 6.0/6.0 (CEFR C2)
- **Coursework:** ME 290 Mechanical Engineering Seminar (Embodied AI and Robotics), **P**.
  CS 101 Introduction to Computing: Engineering & Science, **A+**.
  MATH 221 Calculus I (**PS**), MATH 231 Calculus II (**A-**), MATH 241 Calculus III (**A**).
  No dedicated statistics course in the first year.
